

Announcing the new Public Health Training Network Distance Learning Course *Self-Study Modules on Tuberculosis*

The *Self-Study Modules on Tuberculosis* is a set of 5 educational modules, an introduction, and a glossary designed to provide basic information about tuberculosis in a self-study format.

You will learn

- Transmission and Pathogenesis of Tuberculosis
- Epidemiology of Tuberculosis
- Diagnosis of Tuberculosis Infection and Disease
- Treatment of Tuberculosis Infection and Disease
- Infectiousness and Infection Control

Each module contains:

- **Background:** information to help you understand the module
- **Objectives:** a guide to the information you should learn
- **New Terms:** a listing of new terms
- **Reading Material:** including diagrams, charts, illustrations, and photographs
- **Study Questions:** designed to help you assess how well you have learned the content of the module
- **Case Studies:** designed to help you apply the concepts you have learned in the module
- **Summary:** a description of key points
- **Additional Reading:** a list of references for additional information

The modules were developed by the Centers for Disease Control and Prevention, Division of Tuberculosis Elimination, National Center for HIV, STD, TB Prevention, and the Division of Media and Training Services, Public Health Practice Program Office.

Target Audience

- Entry-level public health workers who have little or no background in tuberculosis
- Staff of correctional facilities
- Drug treatment centers
- Migrant clinics
- Nursing homes
- Homeless shelters
- Other facilities serving persons with or at risk for tuberculosis

Continuing Education Credits

Registered participants who successfully complete the course will receive 2.0 CEUs.

How To Register
